

Comments in Green- March 14th

- Home menu to be as follows:
 - Manage Users
 - All users
 - Add user
 - Specialties
 - Topics
 - Manage Speakers
 - Add Speaker
 - Manage Courses
 - Category
 - Courses
 - Enrollments
 - Smile Program
 - User Transactions
 - User Roots
 - CMS Pages
 - Settings
 - General settings
- Under All Users:
 - Change “Type” to “Specialty” So I can sort by specialty.
 - Comment: The title was changed from “Type to Specialty” but the specialties have not been updated according to the list I sent. The list is: General practitioner, Endodontist, Oral and Maxillofacial Surgeon, Orthodontist, Periodontist, Prosthodontist, Other (leave blank for them to fill, up to 50 characters)
 - Comment: Change “Group of Endodontist” to “Endodontist”. Delete “Dental Surgeon”.
 - Replace “Learner” with “User”
 - I do not see the option to “search” anymore. It was there before and now it is not.
 - Add option where I can click on users name and a pop up window will show me all information the user entered when they signed up to the website.
 - Has not been done yet.
 - Same! Has not been done yet.
 - A user can only be either “user” or “Admin”. Remove the “Tutor” option because speakers now have their own section as shown below.
 - Tutor has not been removed yet
 - Again a user cannot be a tutor or a speaker or whatever you want to call it. A user can either be “user” or “Super Admin”. Keep the speaker option for the speaker section.

- Under “Add User”
 - Specialty list is not showing the specialties that are mentioned above.
- Add “Manage Speakers” to the menu
 - Inside manage speaker be able to do the following: Add speaker picture, Full name, City, Country, Achievements and lectures.
 - When I click on add speaker the list looks like I am adding a user not a speaker. Please look at speaker page and add fields for the list above.
 - Only missing the ‘City’. There is only space for country.
 - Note: Give speakers access to only add a course. Then add functionality just like the “smile program” action of me being able to edit before the course is published on the website.
 - We decided to do this in next phase so no need to do this now
- Under “Add Course” the speaker list should be only from the list of speakers added under “Manage speakers”. Don’t show user list.
 - Speaker list still shows the list of all the users.
 - I see a list but not sure if this list is only speakers. Please confirm.
- Time zone should be shown under each course.
 - Time zone is not showing
 - Done
- Add ability for Admin to add and remove roots. Also add the option to show which Admin added or removed the roots.
 - Has not been done yet.
 - I see there was a section added to add “type of root” under “manage users” section. But what I meant by this is for example if Paul Chaar has 100 roots but I want to add or remove roots then I have the option to make that 100 more or less.
- Add password new rule: Letters, Upper case and numbers.
- Under “topics” I need to be able to add a list of topics that the users can choose from. Then an option of “other” where they can write their own topic if they didn’t find a topic they like from the drop-down menu.
 - Has not been done yet
 - Done
- Take out seconds from the time format.
- For each course I need to be able to send a report to the speaker every week with how many clinicians bought the course so far. For this report I will need the following information:
 - Name of the course
 - Date
 - Topic
 - Name of Speaker
 - Number of attendees
 - \$\$ amount copies bought
 - Date the report is pulled

- Has not been done yet
 - I see the send report button added but it is not specific to the course
- Remove Ads Banner from the drop down menu and Add banner option to every course. Every course might have a unique banner depending on which company is sponsoring the course. So under “Add courses” add section that says “Bottom banner” and “side banner”. Be able to add multiple pictures and videos to each.
 - We decided to keep the Ads section but still under each course add an ads field that pulls from the list of ads. This has not been done yet.
 - Done
- Sorting tab in enrolled users is not working
- “Courses Tab” add number of users who bought the course and add all the money that was collected for it.
 - Has not been done yet.
 - Still has not been done.
 - What is the “add resources” tab?
- Add search under “enrollments”.
 - Has not been done yet.
 - Done
- Fix title spelling in “Manage Speaker”
- Smile program images don’t show on the back end
 - Images still not showing
 - Same! Images still not showing
- Log system can’t be edited even if user is “admin”
